Kudakwashe Mukombachoto

Frontend Developer

Cape Town, South Africa | +27 61 293 5591 | kudakwashe755@gmail.com
Portfolio: kudakwashe.netlify.app | GitHub: github.com/Kudakwashe24

PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building commercial websites, WordPress platforms and interactive web applications. Strong in WordPress development and maintenance including custom and child themes, Elementor, WooCommerce and PHP alongside JavaScript, Vue.js and responsive frontend engineering. Experienced with API integrations, CMS architecture, performance improvements, QA and Git-based deployments, working closely with designers, project teams and clients.

PROFESSIONAL EXPERIENCE

Frontend Developer | Hello Infantry
April 2026 – Present • Remote / Cape Town, South Africa

- Build and refine responsive client websites and frontend experiences using JavaScript, Vue.js, WordPress, PHP and SCSS.
- Implement interface and user-flow improvements for Frogfoot products, including coverage interactions, account journeys, navigation and cross-device fixes.
- Contribute to WordPress knowledge-base and CMS work, including Elementor layouts, reusable templates and JetEngine-based content structures.
- Deliver fixes and features through Git branches, pull requests, QA feedback, staging/UAT reviews and production troubleshooting.

Web Developer / Project Coordinator | Xpand IT
January 2024 – April 2026 • Hybrid / Cape Town, South Africa

- Developed and maintained WordPress and WooCommerce websites, implementing Elementor updates, PHP-based templates, responsive layouts and client-requested features.
- Supported Ubuntu/Linux hosting, MySQL databases, SSL configuration, backups and production deployments.
- Automated WooCommerce product and media workflows using Python and contributed to SEO, performance improvements and day-to-day site reliability.

PROFESSIONAL EXPERIENCE (CONTINUED)

Junior Software & QA Engineer | Enlabeler
October 2022 – December 2023 • Remote / Cape Town, South Africa

- Developed Python/Django modules for invoicing and client-management workflows.
- Tested, debugged and refined application features in collaboration with product and UX teams.

Project Manager / Lead Data Specialist | Aerobotics
February 2019 – September 2022 • Cape Town, South Africa

- Led a team of 50 data validators supporting AI-driven agricultural platforms and coordinated delivery with engineering and product teams.
- Contributed HTML, CSS and JavaScript improvements to internal tools and data-visualisation workflows.
